PROFESSIONAL SUMMARY

Associate Degree student in Information Management (GPA 3.78/4.00) with a track record of building 4 end-to-end full-stack applications — including payment gateway integration and production deployment — through a combination of intensive project-based training and independent initiative. Skilled at designing reliable RESTful APIs and collaborating effectively in teams as well as working independently, with a strong foundation in OOP and database architecture.

TECHNICAL SKILLS

- Programming Languages: JavaScript, SQL, HTML5 & CSS3, PHP, C, C++
- Frameworks & Libraries: Node.js, Express.js, React, React Router, Tailwind CSS, Framer Motion
- Database & Tools: MySQL, PostgreSQL, Git & GitHub, Vercel, Postman, Xendit API
- Concepts & Methodologies: RESTful API Design, OOP, Monorepo Architecture, JWT, Agile/Git Workflow
- Currently Learning: Java, Spring Boot, Thymeleaf (training in progress, expected completion Sep 2026)

PROJECTS

ExternaWear | Tech Stack: React, Node.js, Express.js, PostgreSQL, Tailwind CSS, Xendit API

- Built a men's outerwear e-commerce platform using a monorepo architecture — React frontend decoupled from an Express.js backend.
- Implemented JWT authentication and Xendit payment gateway integration (sandbox mode); structured PostgreSQL database, responsive UI with Tailwind CSS, deployed live on Vercel.

Stokura | Tech Stack: React, React Router, Tailwind CSS, Framer Motion

- Built an inventory & supply chain management system with full CRUD for products, orders, and suppliers; purchase order flow with automatic stock adjustment and protected routes.
- Delivered the project within a 10-day deadline as the final exam of the React Fundamental training; deployed live on Vercel.

LAZADO | Tech Stack: HTML5, Vanilla CSS, Vanilla JavaScript, Fake Store API

- Developed a fictional e-commerce web app with no framework or library — Fake Store API integration, manual cart state management, dark mode toggle, product modal, and toast notifications.

Dutch Villa | Tech Stack: C, MinGW GCC, Windows API

- Built a console-based villa booking CRUD application with file-based data storage, strict input validation, and an interactive console UI using the Windows API.

EDUCATION

Associate Degree (D3) in Information Management — Universitas Nasional PASIM Bandung

Sept 2024 – Present

- GPA 3.78 / 4.00 | Recipient of the Sustainable Community Empowerment Scholarship (Beasiswa PUB) | Accelerated Study Program (3 years to 2 years)

Programming Training Participant — Beasiswa PUB Scholarship:

Logic & Algorithm (C) Sep–Dec 2024 • Data Structures (C) & Databases (MySQL) Jan–May 2025 • Web Fundamentals (HTML5/CSS3/JS) Jun–Aug 2025 • Git & GitHub Aug 2025 • React Fundamental Sep–Dec 2025 • React Advanced Jan–Apr 2026 • Java Fundamental (in progress) May–Sep 2026

SOFT SKILLS

- Analytical Thinking — able to break down complex technical problems into logical, structured solutions
- Problem Solving — experienced in systematic debugging and troubleshooting
- Time Management — proven track record of consistently delivering projects under tight deadlines (10 days)
- Technical Communication — able to present projects and explain technical decisions to reviewers/teams
- Team Collaboration & Independent Work — experienced with version control (Git/GitHub) in collaborative workflows
- Adaptability — quick to learn new technologies (React, Java, Spring Boot) as project needs evolve
- Attention to Detail — meticulous in code writing, input validation, and application testing
